Surgical at DD

At DD we have enhanced the surgical portfolio of products over the years to meet the needs of this ever growing market.

We offer a great range of surgical consumables to assist when you are doing anything from an implant case to a difficult extraction, this range covers drapes, irrigation, saline, sutures and much more! We also have the latest equipment and handpieces, as well as a great range of Geistlich bone materials.

The implant market is growing fast and here at DD we hope to make the buying process for all your consumables as easy as possible. With a quick reference guide at the front and the option to bespoke your own drape kit, why not take a look at the range now.

There is also a suggested start up order at the back of the brochure for anyone looking to start placing implants.

Biogel Skinsense

Sterile, powder-free, synthetic, polychloroprene surgical glove. For use in all surgeries or where latex allergies are a concern. Appropriate for use in the presence of cytotoxic agents, unless otherwise specified.

- Unique coating on the inner surface makes gloves easy to don even with damp hands
- Soothes the skin to help prevent moisture loss
- Beaded cuff for added security
- Stringent quality control measures
- AQL freedom from holes of 0.65
- Non-Pyrogenic

Available in sizes from 5.5 to 8.5. Pack 50 Pairs.

CGB199 - 205

Biogel D Sterile

Sterile Latex Surgical Gloves. Powder-free. Allergy Tested. Handed left and right. Meets both BS and EN 455-1 Quality Standards. Available in sizes 5.5 to 8.5. Box 10 Pairs.

CGB155 - CGB185

Biogel D

Non-sterile, powder-free latex procedure gloves. Allergy Tested. Handed left and right. Available in sizes 5.5 to 8.5. Box 25 Pairs.

CGB055 - 085

Curity Surgical Gloves

Sterile anatomic gloves made of latex with low level of allergenic proteins and with a small amount of powder. Handed left and right. Conforms to BS EN 455-1 Quality Standards.

Available in sizes from 6.0 to 8.5. Pack 1 Pairs.

CGO560 - 585

Premier Sterile Nitrile Gloves

Sterile latex free blue nitrile gloves. Ambidextrous, powder free with textured fingers. Conforms to EN455 Parts 1, 2 & 3.

Available in S, M, L & XL. Pairs. CGN530 - CGN545

Tie-on Face Masks

Comfortable inner lining for facial comfort, Form-fitting, pliable nose band, BFE 99%. Easy Breathing, 100% Latex Free, Fiberglass-free, Type IIR. Box 50.

CHU015 - Blue

CHU017 - Pink

CHU016 - Green

Hypoallergenic Ear-Loop Face Masks

Soft, cool wearing masks with a unique lint-free inner facing that does not irritate the skin. Benefits: Soft white inner layer and fluid resistant outer layer, Form-fitting pliable nose band, BFE over 99%, 100% latex-free, Soft elastic ear loops, Fiberglass-free. Box 50.

CHU023

Ear-Loop Face Masks

Comfortable inner lining for facial comfort, Form-fitting, pliable nose band, BFE 99%. Easy Breathing, 100% Latex Free, Fiberglass-free, Type IIR. Box 50.

CHU018 - Blue

CHU020 - Pink

CHU019 - Green

Com-Fit Mask Super High Filtration

With fluid resistant breathable film and anti-fog foam strip. BFE 99% @ 0.1 micron. Blue. Box 40. CHV010

Bacterial Filtration Efficiency (BFE)
BFE measures how well the mask filters out bacteria when challenged. It is critical to have a BFE of 98% or greater.

Bespoke Drape Kits

In order to better respond to your needs, HYGITECH now offers the chance to assemble your own surgical drape kit. Choose from a catalogue of over 100 components and easily configure the assembly order according to the protocols of your particular surgery.

All our kits come wrapped in crepe paper. Assembled in an ISO Class 8 standard clean room and sterilised in France, HYGITECH personalised kits comply with every demanding standard. Additionally you can personalise the packaging with your logo, photo, degree or name and receive your personalised kit at your practice in only thirty days! For complete peace of mind, please don't hesitate to ask for a free sample to help confirm the contents of your personalised kit.

Hygitex Kit

Composed of every item needed to dress the surgeon, an assistant and the patient. Sterile. Single-use. Box of 5 Kits.

Each kit contains 20 separate items:

- 2 x Pairs of latex powder-free gloves (M)
- 1 x Pair of latex powder-free gloves (L)
- 3 x Tie-on masks
- 1 x Surgical hat
- 2 x Bouffant caps
- 1 x Surgical gown with cotton cuffs
- 1 x Assistant gown with cotton cuffs
- 1 x Patient gown with cotton cuffs
- 2 x Surgical drapes (50 x 62.5cm)
- 1 x Surgical drape (75 x 100cm)
- 1 x Surgical drape with aperture (50 x 60cm)
- 1 x Wrapping paper

COP403

Protect Kit

Best selling kit designed to meet all needs for any type of implant surgery. Sterile. Single-use. Box of 5 Kits. Each kit is composed of 45 items:

- 4 x Polyethylene gloves
- 2 x Tie-on masks
- 1 x Surgical hat
- 2 x Bouffant caps
- 1 x Surgical gown with cotton cuffs
- 1 x Assistant gown with cotton cuffs
- 1 x Patient gown with cotton cuffs
- 3 x Pairs of overshoes
- 2 x Sterile brushes with nail cleaner

- 6 x Paper hand-towels
- 1 x Surgical drape (75 x 75cm)
- 1 x Instrument table cover (bridge) (90 x 120cm)
- 1 x U-shaped surgical drape with adhesive (100 x 150cm)
- 1 x Surgical drape with aperture and adhesive (70 x 100cm)
- 2 x Protective sleeves for tubing (8 x 120cm)
- 3 x Non-latex elastic bands
- 1 x Adhesive film (5 x 80cm)
- 2 x Elastic cap handle covers
- 2 x Adhesive protective covers for control panel
- 1 x Tube support with adhesive
- 1 x Protective PVC X-ray cover
- 1 x Wrapping paper

COP404

Duo Kit

For dressing the surgeon and his assistant. Sterile. Single-use. Box of 5. Contains 32 separate items.

- 4 x Polyethylene gloves
- 2 x Tie-on masks
- 1 x Surgical cap
- 2 x Bouffant caps
- 1 x Surgical gown with cotton cuffs
- 1 x Assistant gown with cotton cuffs
- 2 x Pairs of overshoes
- 1 x Surgical brush with nail cleaner
- 4 x Paper hand-towels
- 1 x Surgical drape (75 x 75cm)
- 1 x U-shaped surgical drape with adhesive (80 x 100cm)
- 2 x Protective sleeves for tubing (8 x 120cm)
- 3 x Non-latex elastic bands
- 2 x Elastic cap handle covers
- 1 x Adhesive protective cover for control panel
- 1 x Wrapping paper

COP402

Transparent Drapes

With Adhesive. Allows the protection of the implantology motor or the control unit. Waterproof and tear resistant. Sheet size: 50 x 40cm. Box 4 x 25 Sheets. COP406

Disposable Implantology Kit

Sterile Set consisting of patient drapes and surface drapes; the set includes handpiece sheaths and adhesive film sheets for handles and keypads. The set is packed in double packing. The convenient detachable label allows easy traceability of the operation.

- Contains:
- 1 x Absorbent/Waterproof drape 100 x 150 cm with adhesive U-shaped split* 6.5 x 30cm in light blue NWF + Polyethylene.
 - 1 x Absorbent/Waterproof drape 75 x 90 cm in light blue NWF+Polyethylene.
 - 2 x Absorbent/Waterproof drapes 50 x 75cm in light blue NWF+Polyethylene.
 - 2 x Omnisleave sheaths 120 x 7cm in transparent PVC.
 - 4 x Film sheets 20 x 20cm² Cross20 in light blue PVC.

COP363

Implantology Assistant's Kit

Sterile Set designed for dressing the assistant or guest staff in the operating room; ideal for all dental implant surgery, periodontal surgery and maxillofacial operations. The set is packed in a sterile double wrapping, wrapped in medical grade paper and the gown is packed with surgical fold. The convenient detachable label allows easy traceability of the operation.

- Contains:
- Special Plus model gown (size 1 M) with surgical fold and 2 hand towels wrapped in medical grade paper, in light blue SMS Microfibre fabric;
 - 1 Cap with adjustable ties, in light blue NWF;
 - 1 SPIRITUS PLUS[®] mask with elastics, in light blue NWF;
 - 2 Non-slip shoe covers, in light blue NWF.

COP360

Implantology Drape Kit

- Contains:
- 1 x Special Plus model gown (length 115cm) size L, 1 x Special Plus model gown (length 118cm) size XL, 1 x Light blue absorbent/waterproof drape 75 x 90cm, 1 x Light blue absorbent/waterproof drape 50 x 75cm, 1 x Absorbent/Waterproof drape 100 x 150cm with triangular opening, 1 x Transparent bag 67 x 75cm with sliding ties for physio dispensers, 2 x Sheaths 120 x 7cm with inserter Omnisleave, 1 x Adhesive film sheets 20 x 20cm² Cross 20.F.

COP390

Complete Surgery Drape Pack

- Contains:
- 2 x Face Masks, 2 x Round Caps, 1 x Surgical Cap (B), 3 x Surgical Gowns (Size L), 3 x Absorbent Towels, 3 x TUBLEX01 Tube/Hose Covers - length 31cm, 1 x Incision Drape, 6 x Adhesive Strips, 4 x Non-woven Swabs, 1 x Monotray Instrument Tray, 1 x Disposable Tweezer, 4 x Adhesive Protection Films (Cross 20), 3 x Surface Drape with Adhesive on long side, 1 x Sontara Patient Drape, 1 x Plastic Clinical Waste Bag, 1 x Omniasurg ASP65 Disposable Aspirator and 1 x Cannula Adaptor.

COP310

Waterproof Surgical Drapes

Surgical drapes are designed to protect both the surgical site and the patient, and that is why they have been made of various fabrics in several sizes in order to meet the diverse requirements of the medical staff using them.

The range includes bi-laminate NWF and Softesse[®] drapes, and the sizes range from the smallest drape 50x50 cm to the largest 133x200 cm. The particular characteristic of Softesse[®] drapes is that they are water-repellent to guarantee a high barrier effect. Bi-laminate absorbent-waterproof NWF drapes guarantee rapid absorption of body fluids without impairing the structure and barrier effect of the waterproof part. Made from waterproof non woven fabric + PE. Waterproof - light blue.

COP378 - Sterile 50 x 75cm - Pack 100

COP380 - Sterile 75 x 90cm - Pack 50

Disposable Surgery Drapes

With adhesive & U-Shaped Hole (11 x 9xm). Waterproof non woven fabric. Light Blue. Patient drapes, with adhesive U-shaped split, are made of various fabrics in several sizes in order to meet the many requirements of the medical staff using them. The range includes bi-laminate NWF and Softesse[®] drapes. These drapes are made with 2 layers, which makes their surface 100% impermeable to liquids and micro-organisms. The particular U-shaped cut on the short side of the drape makes it easy to position the drape near the lower lip or the neck to create an effective sterile barrier. Ease of use and rapid draping help to prevent the risk of contamination and to avoid wasting time. The protective film of the adhesive strip has pre-cut areas to make it easier to apply.

COP370 - Sterile 50 x 75cm - Pack 50

COP371 - Sterile 75 x 90cm - Pack 50

Complete Drape Kit

This sterile kit contains:
2 x Surgeon gown grade A

Piezomed SA-320

The Piezomed offers extremely high-cutting performance, whilst being gentle on soft tissue. Innovative ultrasound technology ensures that only bone substance is resected whilst the surrounding soft tissue remains intact - increasing patient comfort, reducing pain and promoting quicker healing.

- Automatic instrument detection
- Innovative LED ring technology for excellent shadow-free illumination
- Extremely powerful and fast
- Excellent cutting precision and efficient cooling

Consists of: Control unit, Foot Control SN-1, Handpiece with 1.8m cable, Irrigation tubing set, Mains cable, Motor support Stand, Instrument changer, Sterilisation cassette and Bone Instrument Set.

OMP250

Additional tip sets also available: 5 piece Sinus, 6 piece Endo, 3 piece Perio, 2 piece Extraction and B6 & B7 Tips.

OMP251-256

Implantmed

The new Implantmed is safe, simple and flexible. The combination of the next generation Implantmed and Osstell ISQ module ensures improved treatment safety for you and your patients. The high quality new Implantmed now offers ease of use, flexibility and the exciting optional addition of the Osstell ISQ for precisely measuring implant stability. The Implantmed is user-friendly, extremely intuitive and offers improved freedom of movement thanks to the new wireless foot control (optional).

The Implantmed SI-1023 offers:

- Exceptionally intuitive user interface
- New easy-to-use pump design
- Powerful electric motor with 6.2 Ncm torque
- Motor speed range: 200 – 40,000 rpm
- W&H Osstell ISQ module (optional extra)
- Automatic torque control: 5 – 80 Ncm
- Automatic thread cutter function

OMP215

Implantmed Classic SI-923 (2019 Version)

The Implantmed Classic has been upgraded to include:

- The housing print design has been updated
- Due to the latest technology, the display screen is even easier to read, now with pale blue backlighting
- The Classic now uses the new improved EM-19 motor. The EM-19 offers improved ergonomics and user comfort, with its short, light motor housing.

OMP231

Implantmed Drive

Electric motor with W&H connection, maximum torque at motor: 6.2 Ncm motor speed angle voltage range 200 - 400 RPM EM-19 LC Features, LED +Mit electric contacts 1.8m cable.

OMP260

SPI Dongle Receiver

Allows wireless foot control to link Elcomed SA-310 & Piezo med SA-320.

OMP262

Osstell Beacon

- Assess osseointegration and determine implant stability
- Optimal ease of use and intuitive ISQ measurements
- Excellent tool if you use a digital workflow
- Easy to transport between clinics or while traveling
- Complements the more comprehensive Osstell IDx

OMP266

Osstell IDx

- Assess osseointegration and determine implant stability
- Easily collect and manage relevant patient, implant and treatment data
- Full automated digital workflow integration
- Visualizations of stability and healing progress
- Excellent tool for larger clinics and clinical studies
- Full network connectivity & USB port

OMP267

Implantmed Osstell ISQ module

Allows the reliable measurement of implant stability. The measured implant stability quotient (ISQ value) is displayed directly on the screen. The automatic torque control offers you support in the safe insertion of implants.

Implant Center 2

Surgery & Implantology Unit

Elegant design with large touch-sensitive screen. 3 Modes:

- I-Surge – Implantology motor
- Piezotome – For ultrasonic pre-implant surgery
- Newtron – For all Conventional treatments

This second generation unit unites the quintessence of the latest Satelec technology, in particular the large footswitch that manages progress and control of the motor and the ultrasonics. (Handpiece is sold separately, please call our sales team for more information on 0800 585 585).

OMS015

Piezotome Cube

Piezotome cube drastically improves the experience of bone surgery procedures. It opens new horizons in a more predictable, accurate, faster and atraumatic bone treatments. It features the exclusive DPSI (dynamic power system inside) new technology. By continually monitoring and detecting variation between major criteria during surgery, the system automatically adjusts the power delivered by the unit, only when it is needed.

Supplied with 1 x cube LED hand piece, 1 x essential tip kit (BS1S, BS4, SL1, SL2, SL3, LC2)

OMS001

Essential Tip Kit

Contains 1 of each tip BS1 Slim, BS4, SL1, SL2, SL3, LC2.

QSP200

Bone Surgery Kit

Clean and thin cut for maximal bone volume. Contains 1 of each tip BS1, BS2L, BS2R, BS4, BS5, BS6.

QSP201

Intralift 2 Kit

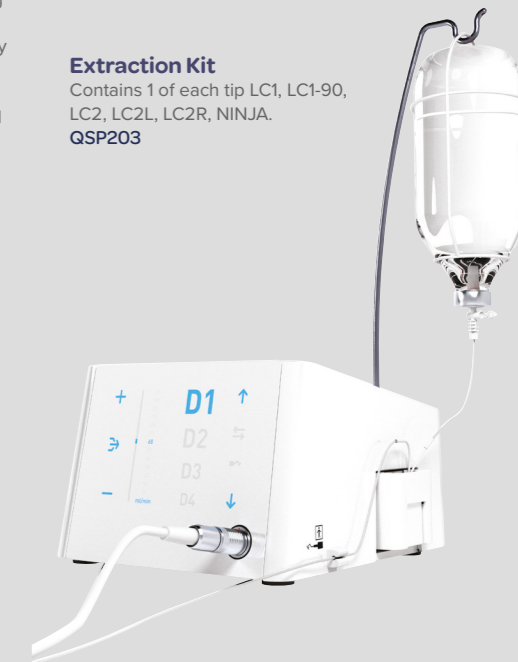

Contains: TKW1, TKW2, TKW3, TKW4, TKW5, Autoclavable Stand, Universal Wrench (These tips will only work with the PIEZOTOME LED HP).

QSP202

Extraction Kit

Contains 1 of each tip LC1, LC1-90, LC2, LC2L, LC2R, NINJA.

QSP203

S-11
Surgical Handpiece
1:1. Short Straight

Lever chuck, Coupling system: ISO 3964 (DIN 13940) 1:1, straight, can be dismantled, for surgical burs and cutters Ø 2.35 mm (also Stryker system), L = 45 mm, external spray, maximum drive speed 50,000 min⁻¹. Indications - apical resection, osteotomy, apical trepanning, bone modelling.

OSD011

S-11 L
Surgical Handpiece
With Mini LED+

Lever chuck, mini LED+ and W&H connection. Coupling system: W&H EM-19 LC / EM-19. 1:1, straight, can be dismantled, can only be used with the W&H electric motor EM-19. For surgical burs and cutters Ø 2.35 mm (also Stryker system), L = max. 45 mm, external spray, maximum drive speed 50,000 min⁻¹. Only compatible with SI10-23 unit.

OFW012

S-11 LG
Surgical Handpiece
With Mini LED+

Lever chuck, mini LED+ and generator Coupling system: ISO 3964 (DIN 13940) 1:1, straight, can be dismantled, for surgical burs and cutters Ø 2.35 mm (also Stryker system), L = max. 45 mm, external spray, maximum drive speed 40,000 min⁻¹. Indications e.g: apical resection, osteotomy, apical trepanning & bone modelling.

OFW011

S-15
Straight
Without Light

Lever chuck. Coupling system: ISO 3964 (DIN 13940) 1:1, straight, can be dismantled, for surgical burs and cutters Ø 2.35 mm (also Stryker system), L = 45 mm, external spray, maximum drive speed 30,000 min⁻¹. Indications - osteotomy in difficult to access areas.

OSD015

WS-75
Surgical Contra-Angle
Handpiece

20:1, can be dismantled, single spray, with hexagon chucking system. For surgical burs and cutters with contra-angled shank Ø 2.35 mm, (shank hardness >50 HRC, >520 HV). Kirschner/Meyer internal cooling system, maximum drive speed 50,000 min⁻¹. Indications e.g: implantation, osteotomy

OCD075

WS-75 L
Surgical Handpiece L 20:1

Hexagon chucking system, push-button and mini LED+ Coupling system: W&H EM-19 LC / EM-19. Maximum drive speed: 50,000 min⁻¹. 20:1, can be dismantled, single spray, for surgical burs and cutters with contra-angled shank Ø 2.35 mm, (shank hardness >50 HRC, >520 HV), Kirschner/Meyer internal bur cooling system. Indications: Specially for preparation of the implant site and implant insertion. Only compatible with unit SI10-23 unit.

OFW075

WS-75 LG
Surgical LED
Handpiece 20:1
Contra Angle

Push-button, mini LED+ and generator Coupling system: ISO 3964 (DIN 13940) 20:1, can be dismantled, single spray, with hexagon chucking system, for surgical burs and cutters with contra-angled shank Ø 2.35 mm, (shank hardness >50 HRC, >520 HV), Kirschner/Meyer internal bur cooling system, maximum drive speed 40,000 min⁻¹. Indications: implantation, osteotomy.

OFW075G

WS-91
Surgical Contra-Angle
Handpiece With 45° Head

Push-button Coupling system: ISO 3964 (DIN 13940) 1:2.7. Can be dismantled, without light, triple spray, for surgical burs and cutters with FG shank Ø 1.6 mm, maximum drive speed 50,000 min⁻¹. Indications e.g: hemisection, extraction of wisdom teeth. Only compatible with SI10-23 unit.

OCD091

WS-91 L
Surgical
Handpiece
Contra-Angle

45° head, push-button and mini LED+ Coupling system: W&H EM-19 LC / EM-19. Maximum drive speed: 50,000 min⁻¹. 1:2.7, can be dismantled, triple spray, for surgical burs and cutters with FG shank Ø 1.6 mm. Indications - Specially to improve access in the premolar and molar region. Only compatible with SI10-23 unit.

OFW91L

WS-91 LG
Surgical LED
Handpiece 1:2.7
Contra Angle

45° head, push-button, mini LED+ and generator. Coupling system: ISO 3964 (DIN 13940) 1:2.7, can be dismantled, with mini LED+, triple spray, for surgical burs and cutters with FG shank Ø 1.6 mm, maximum drive speed 40,000 min⁻¹. Indications : hemisection, extraction of wisdom teeth.

OFW091

Ti-Max Z-SG45L

- 1:3 Increasing
- For FG burs (diameter 1.6mm)
- Triple Spray / External cooling
- Body Material: Titanium
- DURAGRIP Body Coating
- Max Speed: 120,000 per min
- DLC Coating
- Anti-Heat System
- Ceramic Bearings
- Clean Head System
- Push Button Chuck
- Optic

OFN45G

Ti-Max X-SG65L

- 1:1 Direct Drive
- For HP burs (diameter 2.35mm)
- External cooling
- Body Material: Titanium
- DURACOAT Body Coating
- Max Speed: 40,000 per min
- Clean Head System
- Optic

OFN032

Ti-Max X-SG65

- 1:1 Direct Drive
- For HP burs (diameter 2.35mm)
- External cooling
- Body Material: Titanium
- DURACOAT Body Coating
- Max Speed: 40,000 per min
- Clean Head System
- Optic

OSN019

Ti-Max X-SG20L

- Optic
- 20:1 Reduction
- External & internal cooling (Kirschner & Meyer)
- Body Material: Titanium
- DURACOAT Body Coating
- Max Speed: 2,000 per min
- Max Torque: 80 Ncm

OFN031

S-Max SG20

- Non-optic
- 20:1 Reduction
- External & internal cooling (Kirschner & Meyer)
- Body Material: Stainless
- Max Speed: 2,000 per min
- Max Torque: 80 Ncm
- Push Button Chuck
- Double Sealing System

OSN018

SGS-ES

- Non-optic
- Straight Handpiece
- 1:1 Direct Drive
- For surgical burs (diameter 2.35mm)
- Max Speed: 40,000 per min
- Twist chuck

OSN000

Bio-Oss®

Bio-Oss® is a bovine xenogeneic bone graft substitute, and is very similar to human bone in its structure and chemical make-up. The biofunctional biomaterial aids vascularisation and the formation of new bone. The slow resorption of Bio-Oss® increases the stability of the augmentation material.

Leading clinicians rely on Bio-Oss® because:

- Bio-Oss® augmented bone leads to high implant survival rates, comparable with implants placed in pristine bone.
- Bio-Oss® is easy to apply and can be used in the most varied indications.
- Bio-Oss® is validated by 25 years of successful use and testing, documented in more than 900 scientific publications.

Bio-Oss® Pen

Bio-Oss® in a user-friendly applicator.

- Convenient and easy to use.
 - Correct consistency ensures easy handling and optimal bonding to the defect wall.
 - Curved applicator tip makes posterior regions of the mouth more accessible.
 - Reduces spillage and residual waste of granules.
- Available pre-filled with small or large granules.

NIG013-015

Small granules (0.25 – 1mm)

Allows good adaptation to surrounding surface contours. Particularly useful for smaller defects and autogenous block graft contouring. Available in sizes: 0.25g, 0.5g, 1.0g and 2g.

NIG000-002/019

Large granules (1 – 2mm)

Recommended for larger bone augmentations.

Available in sizes: 0.5g, 1.0g and 2g.

NIG003-004/020

Popular Product

Bio-Oss® Collagen

Bio-Oss® Collagen consists of 90% Bio-Oss® granules and 10% porcine collagen. The additional 10% of porcine collagen makes it formable and easy to handle. It's regenerative potential clearly distinguishes Bio-Oss® Collagen from mere collagen plugs. Bio-Oss® Collagen is used in the most varied indications, including ridge preservation, minor bone augmentation and periodontal regeneration. The collagen is absorbed after a few weeks and does not replace the barrier function of a membrane. Available in 100mg and 250mg.

NIG006-007

Bio-Gide®

Bio-Gide® collagen membrane for oral tissue regeneration is used in combination with a bone substitute such as Bio-Oss® or Bio-Oss® Collagen. Due to its bilayer structure, the membrane not only prevents ingrowth of soft tissue into the augmented site, but also acts as a guide for the appropriate cascade of bone, soft tissue and blood vessel development. Bio-Gide® is naturally resorbable and does not have to be removed in a second surgery. Available in two convenient sizes: 25 x 25mm and 30 x 40mm

NIG008-009

Popular Product

Bio-Gide® Perio

Bio-Gide® Perio is a collagen membrane possessing the same biological properties as Bio-Gide® with two modified attributes: the smoothed upper surface slows absorption of moisture and lengthens the time available for exact positioning; the firmer material facilitates cutting when dry, making it optimal for guided tissue regeneration.

16 x 22mm with four sterile templates.

NIG010

Perio-System Combi-Pack

Combines the improved handling attributes of Bio-Oss® Collagen 100mg and Bio-Gide® Perio 16 x 22mm. Used together, they offer optimal properties for regenerative periodontal procedures.

NIG011

Combi-Kit Collagen

Contains Bio-Oss® Collagen 100mg and Bio-Gide® 16 x 22mm. Used together, the two combine optimal properties for ridge preservation & minor bone augmentation.

NIG012

Bio-Gide® Compressed

Bio-Gide® Compressed offers clinicians a new option for alternative handling. The membrane provides a firmer feel, has a smoother surface and is easier to cut. 20 x 30mm

NIG021

Bio-Gide® Shape

Bio-Gide® Shape is a pre-shaped membrane designed to simplify Ridge Preservation in the presence of buccal bone wall defects. In combination with Bio-Oss® Collagen, it provides the ideal solution for predictable ridge preservation and extraction socket management. 14 x 24mm

NIG022

Fibro-Gide® Compressed

A porcine, porous, resorbable and volume-stable collagen matrix, specifically designed for soft-tissue regeneration. Fibro-Gide® has been designed as an alternative treatment option to connective tissue grafts that are considered the gold standard in regenerative soft-tissue procedures. 15 x 20 x 6mm. 20 x 30mm

NIG023

Mucograft®

A unique 3D collagen matrix designed specifically for soft-tissue regeneration in the oral cavity. It is indicated for gaining keratinised tissue and for recession coverage. Mucograft® provides an alternative to autogenous soft-tissue grafts. Painful harvesting of tissue is avoided. Matrix size: 15 x 20mm.

NIG017

Sterile Gallipots

Sterile packed, disposable gallipots 60ml. Available singularly or in packs of 200 NBB015-NBB016

Luxator Periotome Titanium

The Luxator Periotome Titanium offers enhanced durability. Extraction is performed with minimum tissue damage. Titanium coating - glides easier into the socket. The durable titanium coated tip does not require sharpening. The DE3 Titanium Dual Edge enables safer stepped insertion, reducing the risk of slipping. Available in 4 blade sizes: L3S 3mm Titanium Straight Blade, Grey L2S 2mm Titanium Straight Blade, Green DE3 3mm/1.5mm, Titanium Dual-Edge, Grey L3A 3mm, Titanium Angled Blade, Lilac

DEE210

LX Mechanical Periotome Starter Kit

Setting a new standard for trauma free extraction, the Luxator LX mechanical periotome offers:

- Improved safety, precision and access
- Quicker extractions with minimal tissue damage, helps access hard to reach areas.
- The self directing tip allows the periotome tip to follow the root surface, reducing the risk of bone damage.
- A reciprocating tip enables a secure cutting of the fibers in a patient-friendly way.
- The Luxator LX mechanical periotome will only cut when under pressure, which means no risk of slipping.
- The titanium coated tip is a durable tip and remains sharp.

Contains: 1 Handpiece, 2 Periotome Tips Short 2mm & 3mm, 2 Periotome Tips Long 2mm & 3mm, tip holder & plunger

Surgical Instruments

Every Anaqa product is subjected to a rigorous four-step quality control process. This robust process is the reason why Anaqa are able to confidently offer industry-leading warranties on all their instruments.

- Slim beaks for better access and hold
- Stunning finish with high corrosion resistance
- Four stage QC process
- Optional titanium coating for premium finish and maximum corrosion resistance
- High quality medical grade steel
- Smooth joints for stress-free working
- Ergonomic, lightweight design
- Industry-leading warranties

Soft Tissue Punch

The circular scalpel or mucosal punch for soft tissues is an instrument used to create a complete incision of the mucous membrane flap of the diameter of the positioned implant. Omnia offers scalpels with 3 different diameters; the three sizes allow it to be adapted to the main implants on sale. The disposable circular scalpel causes less trauma to the mucous membrane than the classic scalpel because the cut is limited to the size of the implant cap. Box 5.

CURASAN

Safescraper Micross

Disposable instrument with stainless steel blade to harvest autologous bone

- Easy and fast extraction of cortical bone grafts
- Minimal invasive "Tunnel Technique"
- Ready to use, sterile instrument

DEN590

Surgical Procedure Dressings

Dermabond

Prineo Skin Closure System

Provides a flexible microbial barrier with 99% protection in vitro for 72 hours against organisms commonly responsible for SSIs.

CCS100 - 60cm

CCS103 - 22cm

Skin Adhesive - High Viscosity

May be used in place of sutures or staples and lends increased strength through layers by forming its own flexible and sterile water-resistant protective coating.

CCS101 - ProPen APP6

CCS102 - 0.5ml Vials

Curaspon

Absorbable Haemostatic Gelatin Sponge

Gamma sterilised, single-use, 10 x 10 x 10mm, individually blister packed. This form is suitable for many of the most frequent surgical procedures in particular: parenchymal and thoracic surgery.

NJC010 - Pack 50

NJC012 - Pack 60

Kaltostat

Dressing Calcium/Sodium Alginate.

Kaltostat consists of an absorbent fibrous fleece composed of the sodium and calcium salts of alginic acid in the ratio of 80:20. The dressing is presented as a flat non-woven pad for application to surface wounds. In the presence of exudate or other body fluids containing sodium ions, the fibres absorb liquid and swell and calcium ions present in the fibre are partially replaced by sodium, causing the dressing to take on a gel-like appearance. This overlays the wound and provides a micro-environment that is believed to facilitate wound healing.

Indications:- Kaltostat is indicated as a primary dressing for the management of heavily exuding wounds including chronic wounds such as leg ulcers (venous arterial and diabetic), pressure sores, fungating carcinomas, and acute wounds such as donor sites, abrasions, lacerations and post surgical wounds.

Although there are no known contra-indications to the use of Kaltostat the dressing will be of little value if applied to wounds that are very dry, or covered with hard black necrotic tissue. Does not contain animal products.

NDK010 - 5cm x 5cm

Gelatamp

Gelatamp gelatine sponge with colloidal silver provides the dentist with an effective, biocompatible product for reliable post extraction treatment. The colloidal silver has a bactericidal depot effect. This product contains gelatine derived from animal fats.

NJG000 - Pot 50

Size 14mm x 7mm x 7mm.

Contains 5% colloid silver.

NJG002 - Pack 20 - Blister Pack

Contains 10 x double blisters i.e. 20 individual sponges. Size 14 x 7 x 7mm.

Surgical

Individually wrapped haemostatic gauze.

NJH010 - 1.2cm x 5cm

NJH020 - 5cm x 7cm

Hémocollagène

Haemostatic sponge with collagen of bovine origin. Individually blister-packed sterile sponges. Indications: Local haemostasis after dental surgical procedures. Pack 24.

NJD010

Racestyptine Solution

Aluminium Chloride Hexahydrate. Astringent and haemostatic solution. For use in impression-taking with a non-medicated retraction cord for retraction of free gingiva, control of gingival oozing and small haemorrhages. 13ml.

IRD010

Surgigel Powder

SURGICEL™ Powder Absorbable Haemostat provides efficient control of continuous oozing on broad surfaces, ready to use out of the package, with no preparation required. Penetrates through the blood to stop bleeding at the source, effectively achieving haemostasis in a wet field. After haemostasis has been achieved, the bleeding site will not rebleed even if SURGICEL™ Powder is irrigated.

HCD085 - 3g

Surgigel Fibrillar

One layer is more effective at achieving haemostasis than 4 layers of SURGICEL™ Original Absorbable Haemostat; Densely structured fibres provide a surface for platelet adhesion and aggregation, which initiates clot formation. Conforms into bleeding tissue and to irregular surfaces. Lightweight, layered construction is customisable. Pack 10.

HCD080 - 10.2 x 10.2 cm

HCD081 - 5.1 x 10.2 cm

HCD082 - 2.5 x 5 cm

Absorbable Sutures

Ethicon offers a wide range of surgical suture needles, allowing clinicians great flexibility to select the most appropriate needle for the specific need of the tissue being repaired. Listed here are just a few of the extensive range that we stock. All are presented in boxes of 12.

Mini Gracey 13/14 - DCP579

Langer 1/2 - DCP576

Mini Gracey 1/2 - DCP577

Mini Gracey 11/12 - DCP578

CURAPROX

Bridge & Implant Floss

For efficient cleaning of implants and orthodontic appliances.

PCC500

Curasept ADS Implant Mouthwash

Suitable for use before and after surgery, before and after implant placements, after bone regeneration and augmentation procedures. Also after periodontal or peri-implant operations, it forms a protective film and promotes regeneration, no alcohol contains 0.20% chlorhexidine and 0.05% fluoride.

PDM515

TePe

Bridge & Implant Floss

TePe Bridge & Implant Floss is developed for efficient cleaning of implants and orthodontic appliances.

PCT008

Universal Care Toothbrush

An innovative implant brush with a unique design for easy access. The angle of the neck provides improved access to difficult-to-reach surfaces of implants. The slim shape of the brush head facilitates cleaning even in very narrow areas. Soft, end-rounded filaments ensure gentle cleaning.

PAT052

Dentsply Sirona

Cavitron SoftTip

Modified Cavitron TFI insert to allow the disposable SofTip to be placed on the tip. The Thru-Flow lavage delivery system enables flushing of debris for improved visibility.

Surgical Start-up list

Your essentials

Here at DD we are always being asked about which products we would recommend for practices and individuals starting to offer surgical procedures. With that in mind, we have compiled a list of useful start-up surgical products.

Gloves

DD Recommends:
Biogel gloves on [page 4](#).

Saline

DD Recommends:
250ml for single cases or 500ml for multiple cases. Hygitech saline pouches are available in both quantities on [page 14](#).

Burs

DD Recommends:
The oral surgery burs listed on [page 17](#).

Masks

DD Recommends:
A mask that has a BFE greater than 98%. UnoDent masks on [page 5](#) are a great choice.

Irrigation tubing

DD Recommends:
Make sure the irrigation tubing matches the motor that you are using to connect the saline too. See [page 15](#) for our range.

Bone materials

DD Recommends:
The Geistlich range on [page 25](#).

Surgical consumables

- DD Recommends:
- Topper swabs on [page 13](#)
 - Surgical scrub on [page 13](#)
 - Surgical brushes on [page 13](#)
 - Transparent Drapes on [page 7](#)
 - Light handle covers on [page 12](#)
 - Dental Sutures on [page 40](#)
 - Cold bag on [page 43](#)
 - Mouthwash on [page 42](#)

Surgical aspirator tips

DD Recommends:
Roeko Aspirators on [page 16](#).

Instruments

DD Recommends:
Hu-Friedy Surgical Implant & Sinus Lift Kit; this kit is usually recommended at various implant courses. See [page 30](#).

Surgical equipment

DD Recommends:
A full range of surgical motors and handpieces can be seen on [pages 18-24](#).

Anaesthetics and Pharmaceuticals

DD Recommends:
Take a look at our antibacterial & pain relief essentials on [page 44-47](#).

Drape Kits

DD Recommends:
UnoDent Sterile Drape Kits on [page 10](#) or a bespoke drape kit from Hygitech on [page 6](#).
